After only a few days at her grandparents', Katherine is already bored. Deciding to explore the woods nearby, it isn't long before the Blue Man finds her. Some items have been stolen from him, items he would very much like back. Without hesitation, Katherine agrees to find them. After all, it is a chance at magic, a chance she has looked for all her life. The Blue Man sends her to a city where puddles are much deeper and lead to very unexpected places. It is a world where towering dragons fight in the furthest reaches of the sky, where the blue ends and the darkness of the universe begins. It is a place where indoor forests hide under massive domes and are only the entryways to secret, hidden things. And when her journey becomes dangerous, she wonders why she has been given a partner who doesn't want to be there, a guide who is always looking to escape, and an assignment that is next to impossible.

A fabulous lost Amazon city once inhabited by women warriors and containing a rare red diamond: it sounded like myth, but archeologist Jillian Sherwood believed it was real, and she was willing to put up with anything to find it -- even Ben Lewis. Jillian watched him come to a fast boil when she refused to reveal their exact destination upriver in the uncharted rain forests -- and resolved to stand her ground. Neither of them could foresee what the days ahead promised: an odyssey into the fiery heart of passion and betrayal, and a danger that would force them to cast their fates together, immersed in the eternal, unsolved mysteries of love...

Explorer, global green leader, and eco-TV host David de Rothschild recounts the extraordinary journey of the Plastiki, an innovative and mostly untested sixty-foot catamaran that floats on 12,500 reclaimed plastic bottles. It was a voyage that took de Rothschild and a five-person crew 10,000 miles from the U.S. to Australia, sailing through rarely traveled, dangerous waters, risking their lives to call attention to our fragile oceans. Their exploration included urgent study of ocean pollution, island nations threatened by rising seas, damaged coral reefs, and the acidifying ocean itself and their discoveries are a call to action. Packed with exciting narrative, images, maps, journal entries, plans, and sketches, this is the only firsthand account of what may be the most important adventure of our time.
