Its probably the passenger side engine mount. On the later TDi's the mount has a solenoid which controls the rigidity of the mount.. the way the mounts work is that there is a fluid chamber with a plastic body in the middle of it, with small channel cut through it. this allows fluid from the top chamber, through the plastic body, to the bottom chamber. the bottom chamber is rubber lined and can deform under pressure. there is also an airway vented to atmosphere, with a rubber membrane ...

Engine mount solenoid, what is it? | Audi-Sport.net

Left Engine Mount Solenoid Valve Open Circuit is the generic description for the P1573 Audi code, but the manufacturer may have a different description for your model and year vehicle. Currently, we have no further information about the P1573 Audi OBDII code.

P1573 Audi - Left Engine Mount Solenoid Valve Open Circuit

Oddly, there isn't technically a solenoid built into the mount, rather just a sensor which, when the mount starts to collapse, closes a circuit which then sends a fault code to the engine management computer. There have been a few different part numbers for this mount: 4B3 199 379K. and . 4B3 199 379M (current) - \$230.00

Audi Tdi Engine Mount Solenoid Valve N144

The first TDI engine, a straight-five engine, was produced for the 1989 Audi 100 TDI sedan. In 1999, common rail fuel injection was introduced, in the V8 engine used by the Audi A8 3.3 TDI Quattro. From 2006 until 2014, Audi successfully competed in the LMP1 category of motor racing using TDI engine-powered racing cars.
