~~Climate change and philosophy - transformational possibilities~~

Transformation: Theory and practice in climate change and development. The scale of the climate change and development challenge is daunting. Global greenhouse gas emissions continue to grow and climate-related events are causing increasing damage, especially in developing countries. Practitioners, policymakers and academics have increasingly begun to question the potential limits of conventional approaches in delivering adaptation and mitigation.

~~Climate Change and Philosophy: Transformational Possibilities~~

"This thought-provoking book is about the transformation of the modern, human world in the face of climate change. The authors take the interconnections between our changing climate, the shifting realities of modernity and philosophy itself very seriously, and if it were needed this book is proof that philosophy can make a contribution to humanity's most important conversation."
