Introduction. This encyclopedia brings together established and emerging research findings in all relevant disciplines of gerontology and population aging. It provides comprehensive coverage of the entire breadth of the field, gives readers access to all major sub-fields and illustrates their interconnectedness with other disciplines.

Encyclopedia of Gerontology and Population Aging ...

Demography is the statistical study of populations, especially human beings. Demographic analysis can cover whole societies or groups defined by criteria such

as education, nationality, religion, and ethnicity. Educational institutions usually treat demography as a field of sociology, though there are a number of independent demography departments. Based on the demographic research of the earth, earth's population up to the year 2050 and 2100 can be estimated by demographers. Formal demography l
