Wings is the final book in the Bromeliad Trilogy, and concludes how the gnomes get back to their spaceship. As with the other books it's witty and funny and a great story. Terry Pratchett has a way of writing humour that is clever but also easily understandable, and I know I'll come back to the series in the future when I need a good laugh.

In a world whose seasons are defined by Christmas sales and Spring Fashions, hundreds of tiny nomes live in the corners and crannies of a human-run department store. They have made their homes beneath the floorboards for generations and no longer remember -- or even believe in -- life beyond the Store walls. Until the day a small band of nomes arrives at the Store from the Outside. Led by a young nome named Masklin, the Outsiders carry a mysterious black box (called the Thing), and they deliver devastating news: In twenty-one days, the Store will be destroyed. Now all the nomes must learn to work together, and they must learn to think -- and to think BIG. Part satire, part parable, and part adventure story par excellence, master storyteller Terry Pratchett's engaging trilogy traces the nomes' flight and search for safety, a search that leads them to discover their own astonishing origins and takes them beyond their wildest dreams.

When you're four inches high in a world full of giant people, things never go very well for long. After running into trouble at the quarry, the nomes want to go home. The problem is, 'home' is somewhere up in the stars, in some sort of Ship. Masklin must find a way to get to the 'launch' of a 'communications satellite' (whatever that is). And so begins an incredible journey, filled with peril, planes, honking geese . . . and a walking sandwich. The fantastically funny third book of the nomes, from the author of the bestselling Discworld series.

Hilariously inventive, witty and highly original,The Bromeliadis the enormously popular Terry Pratchett's magnificent trilogy of tales about a race of little people struggling to survive in a world of humans.

Three four-inch-high nomes, led by Masklin and aided by the tiny computer called Thing, set out on a dangerous journey, determined to contact the ship that brought them to Earth and to find a way home for all the nomes.

Accompanied by gorgeous watercolors, this fascinating book traces the journey of the yellow butterfly as it migrates from the Yucatan rain forest to the shores of North America--a perilous trek of more than two thousand miles.

\*The final collection of short stories from the incredible Sir Terry Pratchett!\* Imagination is an amazing thing. It can take you to the top of the highest mountain, or down to the bottom of the deepest depths of the sea. This where it took Doggins on his Awfully Big Adventure: a quest full of magic and flying machines. (And the world's best joke - trust me, it's hilarious.) It took three young inventors to the moon (where they may or may not have left a bottle of lemonade) and a caveman on a trip to the dentist. You can join them on these adventures, and many more, in this incredible collection of stories . . . From the greatest imagination there ever was. Written for local newspapers when Terry Pratchett was a young lad, these never previously published stories are packed full of anarchic humour and wonderful wit. A must-have for Terry fans . . . and young readers looking for a fix of magic.

This is the story of Jekub, the Dragon in the Hill with great big teeth and a great loud voice. (Well, that's according to the nomes, but they are only four inches tall.) When humans threaten their new home in the quarry, the natural thing would be to run and hide. But the nomes have got the wild idea that they should fight back. After all, everyone knows that nomes are faster and smarter than humans, and now they have a secret weapon . . . The fantastically funny second book of the nomes, from the author of the bestselling Discworld series.
