Hi kinderson10, Welcome to Microsoft Answers!
I would suggest you to run Quicken 2000 in
comaptibility mode and check. Most programs
written for Windows Vista also work in this
version of Windows, but some older programs
might run poorly or not at all.If a program
written for an earlier version of Windows
doesn't run correctly, you can try changing
the compatibility settings for the program

The problem some Quicken users run into is that Quicken appears to be running slowly at times, and it turns out to be because of open windows hiding behind the main window. If there are reports open which need to recalculate after every transaction edit or entry is saved, it can make Quicken run slowly -- and there's no visual indication to users.
