In 1955, Zetor announced that it would start selling the Zetor Super 35, a tractor with 42hp and a four-cylinder engine. 5 years later the company made the Super 55 that came with a 50hp engine. It had a lot more features that included an air compressor (no need to leave the field to blow up the tires), a differential lock (the legacy from the Model 25), suspended front axle and a heated cab ...

This is a nonfiction children's book about octopuses.

Field Manual FM 3-12 (FM 3-38) Cyberspace and Electronic Warfare Operations April 2017 Over the past decade of conflict, the U.S. Army has deployed the most capable communications systems in its history. U.S. forces dominated cyberspace and the electromagnetic spectrum (EMS) in Afghanistan and Iraq against enemies and adversaries lacking the technical capabilities to challenge our superiority in cyberspace. However, regional peers have since demonstrated impressive capabilities in a hybrid operational environment that threaten the Army's dominance in cyberspace and the EMS. The Department of Defense information network-Army (DODIN-A) is an essential warfighting platform foundational to the success of all unified land operations. Effectively operating, securing, and defending this network and associated data is essential to the success of commanders at all echelons. We must anticipate that future enemies and adversaries will persistently attempt to infiltrate, exploit, and degrade access to our networks...

Relates the history of the tractor and shows the changes in design that have resulted in the diesel-powered giants of today.

Revisiting the Past in Museums and at Historic Sites demonstrates that museums and historic spaces are increasingly becoming "backdrops" for all sorts of appropriations and interventions that throw new light upon the objects they comprise and the pasts they reference. Rooted in new scholarship that expands established notions of art installations, museums, period rooms, and historic sites, the book brings together contributions from scholars from intersecting disciplines. Arguing that we are witnessing a paradigm shift concerning the place of historic spaces and museums in the contemporary imaginary, the volume shows that such institutions are merging traditional scholarly activities tied to historical representation and inquiry with novel modes of display and interpretation, drawing them closer to the world of entertainment and interactive consumption. Case studies analyze how a range of interventions impact historic spaces and conceptions of the past they generate. The book concludes that museums and historic sites are reinventing themselves in order to remain meaningful and to play a role in societies aspiring to be more inclusive and open to historical and cultural debate. Revisiting the Past in Museums and at Historic Sites will be of interest to students and faculty who are engaged in the study of museums, art history, architectural and design history, social and cultural history, interior design, visual culture, and material culture.

An engaging guide to the innovative tractor models that achieved legendary status. Accompanied by superb colour photography of all the tractors.

The Chainsaw Operator's Manual is an essential safety tool for chainsaw operators. It is the ultimate guide to basic chainsaw operating techniques covering safety, maintenance and cross-cutting, but not tree felling. Detailed diagrams illustrate horizontal, vertical and boring cuts, as well as trimming and cross-cutting techniques. Safety considerations are discussed, including workplace safety, occupational hazards, kick-back and identifying dangerous trees. An explanation of the 'tension' and 'compression' forces in timber is also provided to help you understand where to begin cutting to avoid jamming the saw. The book covers chainsaw maintenance in detail, explains all aspects of the equipment and helps you select the right chainsaw and personal protection equipment for your needs. Trouble-shooting charts are included to help you solve operating problems. This manual has been updated to take into account the most recent changes in nationally accredited competency standards. It is a must-have for anyone operating a chainsaw.

Terry Eagleton explains that freedom, for Marx, entailed release from commercial labour, "a kind of creative superabundance over what is materially essential". Eagleton outlines the relationship between production, labour and ownership which lie at the core of Marx's thinking. Marx's utopia was a place in which labour is increasingly automated, emancipating the wealth of sensuous individual development so that "savouring a peach [is an aspect] of our self-actualisation as much as building dams".

Tractors of the World is a comprehensive guide to more than 220 of the best-known tractors produced throughout the world over the last 120 years. It is illustrated with more than 400 color and black-and-white photographs and artwork; cutaway illustrations; and comprehensive specifications give technical and engineering information.
